:: FACULTY AND STAFF SCHOLARSHIP

**"MANY OF YOU KNOW THAT SCHREINER,
WITH ITS UNDERGRADUATE FOCUS,
MAKES CREATIVE AND EFFECTIVE INSTRUCTION
ITS PRIORITY FOR FACULTY."**

– PRESIDENT TIM SUMMERLIN

Although it has been years since I have served as a university faculty member, I have vivid memories of the challenges and pleasures of the profession. Central to those experiences is balancing commitments to the classroom and to the profession. Many of you know that Schreiner, with its undergraduate focus, makes creative and effective instruction its priority for faculty. For that reason, we provide a wide range of programs such as teaching mini-grants and our Summer Fellows program to support our faculty in their search for ways to enhance the learning experience.

Not everyone knows, however, that we are also committed to a healthy teacher-scholar model, which asks all faculty to find appropriate ways to demonstrate that they are active scholars. After all, undergraduate research experience is a vital element of our learning program, as evidenced by student grant support and numerous presentations, posters and performances by Schreiner undergraduates. And the instructor must model the kind of behavior expected of the student.

However, we believe in an inclusive definition of scholarship, and a core message to our faculty is to discover and pursue those expressions that

best link to their disciplines and their instructional role. As you consider this publication of scholarly and creative work by Schreiner faculty and staff members, you will be struck by that diversity. Here is research into the use of the arts to promote literacy, patterns of global immigration, techniques of exercise analysis, the appropriation of popular forms of spirituality across cultures, and much more. You will encounter artistic exhibits and musical performances, service to professional societies and consultancies that bring academic skills to bear on society's needs.

In sum, I hope that this 2014-2015 edition of Scholarship Spectrum articulates well the commitment of Schreiner University faculty to applying the knowledge that serves learning in the classroom and laboratory to the world of scholarly interchange and human needs. As a president who does remember the demands of pursuing that professional balance, I am proud of these faculty members.

Tim Summerlin

**I HAVE COME TO BELIEVE THAT A GREAT TEACHER IS A GREAT ARTIST
AND THAT THERE ARE AS FEW AS THERE ARE ANY OTHER GREAT
ARTISTS. TEACHING MIGHT EVEN BE THE GREATEST OF THE ARTS
SINCE THE MEDIUM IS THE HUMAN MIND AND SPIRIT.**

- JOHN STEINBECK

The scholarship of teaching is a priority at Schreiner University. Professors, administrative leaders and students form a professional learning community as we collaborate to intellectually and aesthetically explore our world. The arts provide a catalyst for engaging teaching and learning in the 21st century college classroom. Enhancing learning through the visual and communicative arts has the potential for developing critical and creative thinking dispositions and makes us passionate researchers of new knowledge.

Neva Cramer, Ph.D.
