1. State the educational purpose of the assessment program:

In addition to basic computer skills and knowledge required of all Schreiner University graduates, students majoring in MIS should gain breadth and depth in the technical orientation to the information system field of study. Students will not only be technically knowledgeable, but they will also develop the skills needed to work individually and to work in a team environment. The MIS curriculum will emphasis skills and knowledge that will enable students to be successful in the Information Systems work force as well as in post graduate studies.
2. Educational goals, assessment for each goal, performance standards, and findings:

   Based on our assessment results and our 5-year program review, curriculum changes were implemented beginning in 2005-2006.

Upon graduating with a major in Management Information Systems a student will be able to:

**Goal 1:** Effectively communicate orally and in written form. The student will make oral presentations and create written documents relating to areas of technology. The oral presentation and written document must be logical, organized, and informative. All students must meet the above criteria. Satisfactory performance (C or better) in Fundamentals of Information Systems, Information Systems Theory and Practice, Systems Analysis and Design, and Senior Project/Internship. (Note: Since the MIS major was implemented fall 2001, there are no statistics for Fundamentals of Information Systems, Information Systems Theory and Practice, Systems Analysis and Design, and Senior Project/Internship prior to fall 2001. Also the Senior Project/Internship was not offered 2001-2002).

**Curriculum:** Emphasis will be placed on proper use of computer related terminology, presentation of technological information, and real world work experience or study of real work situation.

**Faculty Development:** Faculty are encouraged to keep up with current happenings and best practices in the field of Information Systems.

**Out-of-class Experience:** Students are encouraged to observe good presentation skills in other classes.

**Goal 2:** Demonstrate an understanding of components of computers and networks. The student will be able to recognize and describe various components of a computer and network architecture. All students must meet the above criteria. Satisfactory performance (C or better) in Computer Concepts and Applications, Fundamentals of Information Systems, and Systems Analysis and Design. (Note: Since the MIS major was implemented fall 2001, there are no statistics for Fundamentals of Information Systems, and Systems Analysis and Design prior to fall 2001.)

IS 3331 Systems Analysis and Design – 100%
2003-2004  IS 2301 Computer Concepts and Applications – 74%
IS 2320 Fundamentals of Information Systems – 88%
IS 3331 Systems Analysis and Design – 100%

2004-2005  IS 2301 Computer Concepts and Applications – 76%
            IS 2320 Fundamentals of Information Systems – 96%
            IS 3331 Systems Analysis and Design – 60%

2005-2006  IS 2301 Computer Concepts and Applications
            IS 2320 Fundamentals of Information Systems
            IS 2360 Hardware and Software
            IS 3331 Systems Analysis and Design
            IS4350 Emerging Technologies

Curriculum: Emphasis will be placed on proper use of computer related
terminology, and recognition of hardware components.

Faculty Development: Faculty are encouraged to use “show and tell” with computer hardware.

Out-of-class Experience: Students are encouraged to observe computer
advertisements and apply knowledge to critically evaluate advertisements.

Goal 3: Effectively use computer software to solve problems. The student will use
general application software and/or develop effective program code to solve problems.
All students must meet the above criteria. Satisfactory performance (C or better) in
Computer Concepts and Applications, Computer Programming, Productivity Software,
and Object-Oriented Programming. (Note: Since the MIS major was implemented fall
2001, there are no statistics for Computer Programming, Productivity Software, and
Systems Analysis and Design prior to fall 2001.)

1997-1998  IS 2301 Computer Concepts and Applications - 84%
1998-1999  IS 2301 Computer Concepts and Applications - 93%
2000-2001  IS 2301 Computer Concepts and Applications – 82%
2001-2002  IS 2301 Computer Concepts and Applications – 78%
            IS 2310 Computer Programming – 100%
            IS 2330 Productivity Software – 90%
            IS 3332 Object-Oriented Programming – 100%
2002-2003  IS 2301 Computer Concepts and Applications – 74%
Curriculum: Emphasis will be placed on proper use of software applications and writing effective program code.

Faculty Development: Faculty are encouraged to keep-up with current application software and programming languages.

Out-of-class Experience: Students are encouraged to use application software and programming languages where appropriate in other classes.

Goal 4: Effectively work with others in a team environment. The student will demonstrate satisfactory performance when working in classroom peer teams and in a work environment. All students must meet the above criteria. Satisfactory performance (C or better) in Fundamentals of Information Systems, Information Systems Theory and Practice, System Analysis and Design, and Senior Project/Internship. (Note: Since the MIS major was implemented fall 2001, there are no statistics for Fundamentals of Information Systems, Information Systems Theory and Practice, Systems Analysis and Design, and Senior Project/Internship prior to fall 2001. Also the Senior Project/Internship was not offered 2001-2002.)
